e-Learn Anytime from Anywhere...

Learn in a rich, interactive learning environment where class materials, exercises, and discussions occur much as they would in a face-to-face class - but free from time or space limitations. Learners and instructors join in discussions and participate in class activities on their own schedules at their convenience. Post pages for others to see and discuss. Chat with others in real-time who are online. It's all possible with Weblearning Network.

e-Learning at WebLearning Network comes with 24-hour mentor support to guide you and a plethora of practice assessments coupled with Forums, Discussions, Chats and more.

Before using WebLearning, take a Quick look at the [WebLearning eLearning demo](#) page. This demo is intended to provide you with a visual tour of how our award winning Learning Management System works:

- Reduce training costs
- Build robust IT skills anywhere, anytime
- Train large audiences from one source
- Prepare students for certifications
- Gain support from mentors who help students develop job skills

Why e-Learning and m-Learning?

Technology is changing at cyber-speed. To maintain your competitive edge, you need to be able to access training on the skills you need, when you need them. That's why we developed the WLN Student Centre. Our on-line university allows you to log onto training that is designed to keep you on the leading edge - anytime, anywhere.

WLN can be accessed 24x7 via the Internet. Training can take place at a time that is best suited to your schedule - during breaks in business hours, after work hours, at home, or on the road. For quick access to e-learning the WLN Learning Knowledge Centre is unmatched in any industry. Nothing helps you maintain your professional edge better than our on-line training and career resources.

What is e-Learning and m-Learning?

On a basic level, e-learning and m-Learning is the delivery of learning using modern communication technologies such as the Internet, company intranets, digital television, smart phones, tablets and other web-based mediums. And while this definition is true, it only begins to scratch the surface of what e and m-learning is, and what it can do for your organisation.

By delivering learning via the Internet, Tablets and Smart phones, learners enjoy the benefit of the web's flexible, 'always open' nature, with easy access to the skills they need, at a time and a place to suit them. And because courses are typically broken down into small manageable segments, they can be worked through at times to fit around employees work and family commitments; whether at their desks, at home, or on the move.

e-Learning and m-learning then, offers a cost-effective and adaptable model for delivering learning through business, whether you are looking to provide long-term professional development, individual job skills, or employee self-development.

An open, scalable solution

WebLearning Network is an open, best of breed, learning management system - LMS platform with an integrated support for synchronous and asynchronous features including support for chat and social media. Whether you want to train one group or your entire enterprise, Weblearning Network is the answer. It is a complete learning management and delivery platform that lets you seamlessly integrate your course content, whether you create it yourself or purchase it from us or leading providers.

You can mix and match delivery methods in a single course - including self-directed, asynchronous collaboration, or real-time collaboration. You can assess and track results. WebLearning offers a robust set of learning management capabilities that make it easy to manage even the most extensive learning programmes.

When you choose WebLearning Network, you get a comprehensive software platform that lets you create, manage, and deliver e-learning that changes the way your business learns and works. Only Weblearning Network provides so many compelling reasons to make it your choice for e-learning. Organisations around the world already rely on WebLearning Network (WLN) for enterprise-wide learning. Here's why you should join us:

Access to the world's best content With Web Learning Network, you can incorporate content from almost any source - leading authoring tools, word processors, presentation packages, and more. Great content is at the core of an effective e-learning solution. With Web Learning Network, you can create the most compelling learning experience possible.

A choice of learning methods Web Learning Network lets you combine self-directed learning with powerful interactive methods that enable users to learn from their colleagues and instructors. Collaborate over time, in real-time, or both - the choice is yours. Now you can choose the delivery method that works best for your content and audience, customising each learning experience for maximum results.

An enterprise-wide vision Web Learning Network is an extremely powerful, scalable solution that can grow with your organisation. No matter how large your organisation is, Web Learning Network has the proven scalability that lets it meet your ongoing learning needs. With its three-tiered architecture, Web Learning Network can be configured to run on a single departmental server or multiple servers for enterprise-wide deployment.

Powerful management capabilities Web Learning Network provides an extensive array of management tools that let you measure the effectiveness of your learning program and the competency of your employees - ensuring that e-learning is achieving maximum business results.

Integration with your organisation Web Learning Network can be integrated with back-end systems, such as HR databases and e-commerce systems. With Web Learning Network, learning becomes an integral part of your enterprise.

Choose the delivery method that works for you

With Weblearning Network, you have unequalled flexibility when choosing how you deliver your online courses. We bring you three key modes of delivery:

Collaborative, Asynchronous learning...

Learn in a rich, interactive learning environment where class materials, exercises, and discussions occur much as they would in a face-to-face class - but free from time or space limitations. Learners and instructors join in discussions and participate in class activities on their own schedules at their convenience. Post pages for others to see and discuss. Chat with others in real-time who are online. It's all possible with Weblearning Network.

Self-directed, interactive learning

Individual learner's access learning content and work on his or her own in a rich learning environment.

Collaborative, live learning

In a real-time classroom, instructors can quickly and easily share any type of content with the online class using standards-based data, audio, and video conferencing. Instructors can put traditional content, such as presentations, on every student's screen simultaneously using a real-time whiteboard.

They can annotate the whiteboard content to convey concepts, create interactive exercises, share applications, ask questions, debate ideas in an engaging, effective environment, and even pass control to students to guide the class.

Students can raise their hand electronically; send private messages to the instructor, chat with other learners, and much more. The important point is that WebLearning Network puts all three at your fingertips when designing your training programmes. And all three benefit from WebLearning Network's full tracking, assessment, and management capabilities.

Virtual eClass Solutions from WebLearning

Live virtual classes are designed to enable the flexibility and diversity needed to support classroom style learning in a remote environment. Attend a live Internet-based, instructor-led training course at conveniently scheduled times. During these interactive sessions, students can communicate with the instructor and mentors who support the class.
